

# Artificial names for New Roles in the Document Type Role

## Proposal for common role naming

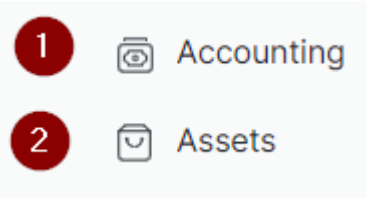

The proposal is to reduce random or client/customer specific artificial numbering and naming of roles ( document type Role ).

In the following illustration (1) we have an overview of customized Roles. They have a naming scheme of e.g. "00181 Einkauf". In common this can be formed to "\d\d\d\d Subject". In addition we have ( not marked in the picture ) a set of default ERPNext roles.

# Legende:

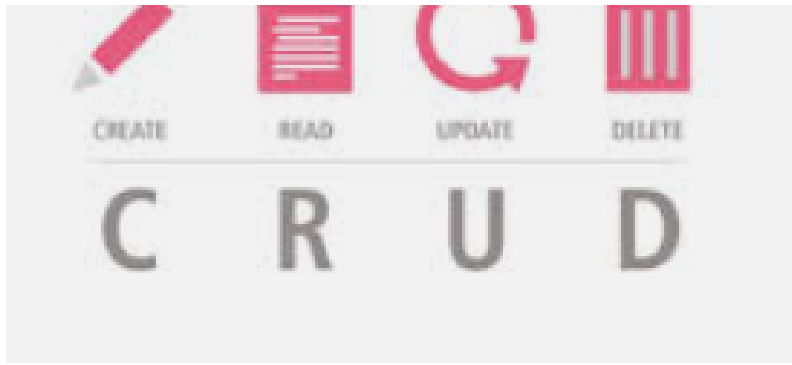

The numbers are being assigned per module. Module Accounting has the number 001 in order of apperance in the menu band

## Menge der Operationen

Symbol	Operation
c	create and save document
r	read document
u	update document ( change value and save it )
d	delete document
p	print document
i	import documents
e	export documents
s	submit / cancel / amend documents

----- Shorthand is **CRUDPIES**
